EDUCATION

Bachelor of Computer Science - General Program Co-op, Concordia University - Montreal, QC 2024

SKILLS

Languages: JavaScript (ES6+), jQuery, TypeScript (**ReactJS & Angular**), Redux.js, HTML5, CSS3, NodeJS (14 to 20+), Java (Spring Boot), Python (Django), C# (.NET), PHP (Wordpress)

Tests Jest (Javascript), JUnit (Java), Playwright (both Javascript and Java), Cypress (Javascript)

Others: GIT(familiar with Bitbucket, Github), Material-UI, PostgreSQL, MongoDB, Apache, REST APIs

Cloud & Development Tools: Docker, Kubernetes, Microsoft Azure, JIRA, Amazon AWS, Jenkin CI/CD

EXPERIENCE

Full Stack Developer

Jan 2023 - Dec 2023

Bombardier Aerospace

Montreal, QC, CANADA

- Implemented aircraft data visualization features using **React 16** (and helped upgrade to **React 18**), **JavaScript**, **HTML5**, **CSS**, Material-UI, and Mapbox API.
- Wrote 100+ unit tests with React Testing Library and Jest, achieving 95% coverage, ensuring the reliability of React components.
- Wrote e2e automation tests in **Playwright** to reduce manual testing efforts.
- Coordinated with backend teams to integrate RESTful APIs built on **Node.js**, reducing loading times by 15%, using **Redux.js** to manage stored data.
- Collaborated with UX/UI designers to convert Figma prototypes into web features using JavaScript.
- Managed tasks and sprints via Jira for project execution.

Full Stack Developer

Jan 2022 - May 2022

CGI Canada

Montreal, QC, CANADA

- Optimized VIA Rail Canada's booking management front-end in **Angular 10** (TypeScript), enhancing code efficiency and reducing loading times by 15%.
- Deployed features at [VIA Rail Canada](https://www.viarail.ca) website, optimizing infrastructure with Docker to improve coordination and scalability.
- Enhanced internal HR management processes by designing and deploying a system using **Java 17 (Spring Boot 2.3)**, achieving a 20% increase in operational efficiency.
- Played key roles in Agile development, including leading sprint planning, daily stand-ups, and managing tasks with JIRA to resolve issues.

WordPress Developer

May 2018 – Apr 2021

Vanntechns Web Studio

Montreal, QC, CANADA

- Gained expertise in WordPress and WooCommerce, successfully completing several website projects, including darchisystems.com and huongxua-anjou.com.
- Functioned as a business analyst, facilitating communication between clients and an international outsourced team in India, Philippines, and Dominican Republic.
- Managed project timelines and maintained updates on the company's and clients' Trello boards.
- Utilized Bitrix24 CRM software for efficient tracking of client communications and emails.

Data Analyst Intern

C.H.Robinson

May 2021 - Dec 2021

Montreal, QC, CANADA

- Facilitated communication between support staff, clients, and Canada customs release staff, streamlining the documentation process.
- Gained hands-on experience with relational database management systems, focusing on data retrieval and manipulation using SQL, with exposure to Postgres and Oracle databases.
- Advanced system utilization and operational efficiency through skilled use of SQL in internal systems like Datacap, IRS3, NCC, and Navisphere.
